Hiding Power Test : Superior Coverage

Achieving a flawless finish starts with superior hiding power. We tested CROWN GOLD against a competitor product, and the results speak for themselves. With CROWN GOLD, you get better coverage, better value, and better results.

One-coat and two-coat roller applications on black & white cement board panels.

Dry hiding test on Leneta paper at 100µm wet film thickness (WFT)
- equivalent to an actual two-coat roller application.

Wet Scrub Test (ASTM D2486) : Superior Scrub Resistance

ASTM D2486 is a global ASTM international standard method to measure a paint's resistance to wear and tear from washing and scrubbing. Higher scrub cycles indicate better durability, reducing the tendency for chalking over time.

Higher number of scrub cycles indicates better scrubability.

Timeless Favorite

A curated range of colours that never go out of style. The Timeless Favorite Collection offers classic shades loved for their elegance, versatility, and enduring charm. Perfect for any space, these colours bring warmth and beauty to your home, creating a look that lasts for years to come.
