SEALERS AND PRIMERS ARE ESSENTIAL. HERE'S WHY:

They promote excellent adherence

Having the top coat bond properly with the substrate is absolutely important. Failing which, paint will begin to deteriorate and peel prematurely.

They save money and time

Primers and sealers can help you get the complete coverage and texture you need without using too many coats of paint. They also protect painted surfaces, requiring less frequent repainting.

They ensure better surface texture

Effectively hide wall imperfections and natural blemishes. They also ensure that your walls stay vibrant and presentable for years.
